

OTTO ARENA SYSTEM GmbH

SUPERIOR ARENA FOOTING PERFORMANCE THROUGH
INTEGRATED SYSTEM SOLUTIONS

For more than 30 years, OTTO ARENA SYSTEM GmbH has been developing highperformance footing systems for outdoor and indoor riding arenas, paddocks, and equestrian stables. Originating from the development of the OTTO Perforated Mat, the company has evolved into a specialist for complete, fully engineered system solutions.

Today, OTTO ARENA combines materials, technology, and expert consulting to deliver customized footing systems precisely tailored to discipline, location, and load requirements. A passion for equestrian sport, decades of experience, and a commitment to maximum performance shape every product innovation.

OTTO footing systems are proven in practice – from small private arenas to international competition venues. They stand for durability and optimal functionality, support peak athletic performance for horse and rider, and reliably protect equine health.

Sustainability is an integral part of product development: OTTO ARENA deliberately uses recycled materials and holds the corresponding certifications. This ensures technical excellence while maintaining a strong focus on resource efficiency and circular economy principles.

Based in Middle Franconia, OTTO ARENA delivers projects throughout Germany, across Europe, and worldwide.

MODULAR SYSTEM FOR EVERY REQUIREMENT

- Mat systems for outdoor arenas, indoor arenas, paddocks, and stables
- Footing materials and additives for optimal riding characteristics
- Complete solutions for new construction and renovation
- Inhouse laboratory sand analysis for precise system configuration

YOUR PARTNER FOR PLANNING AND IMPLEMENTATION

OTTO ARENA supports projects from initial concept to final realization. Whether for an outdoor arena, indoor arena, paddock, or round pen, the company provides wellengineered systems designed for lasting, highperformance footing in daily use.
